

State Meteorologist

A full-time position exists at PEMA, Harrisburg, Pennsylvania (Dauphin County). This position is responsible for investigating, interpreting and analyzing meteorological data. An incumbent will serve as a liaison between national, federal, state and local meteorological sources to determine weather-related threats to the Commonwealth of Pennsylvania; serve as primary point of contact for PEMA and other public safety agencies to enhance preparedness and response mission capabilities; develop policies and procedures; prepare education and planning materials; prepare weather briefings and presentations; provide advice and direction to counties and municipalities; and provide consultation to the Director of PEMA on weather synopses.

Salary: \$58,719 - \$89,213 (negotiable) with a retirement and benefit package.

Requirements: Five years of professional experience in meteorology, and a bachelor's degree in meteorology, atmospheric sciences, or a closely related field; or an equivalent combination of experience and training.

How to Apply: Send a letter of interest and resume to Heidi Koppenhaver in the PEMA Human Resources Office at hkoppenhav@pa.gov.

Note: We will be accepting resumes until June 26, 2015.

The Commonwealth of Pennsylvania is proud to be an equal opportunity employer supporting workforce diversity
